

Steel, North America segment

Introduction and highlights

EVRAZ is a leading North American producer of high-quality, engineered steel for rail, energy and industrial end user markets, with a focus on manufacturing products with unmatched quality for the Group's customers. The segment is the largest producer of rail and large-diameter pipe (LDP) in North America. EVRAZ also holds leading positions in Western Canada's oil country tubular goods (OCTG) and small-diameter pipe (SDP) markets, as well as in the US West Coast plate market.

Our goals

- Grow leadership position in North American energy pipe market
- Maintain leading position in the Western region plate market
- Expand leading position in the rail market

In December 2019, EVRAZ North America implemented a reorganisation of business units to strengthen focus on safety, quality and operational excellence across the Steel, North America segment. The business units are now organised by three geographic locations: Canada, Pueblo and Portland, replacing the previous product group structure. Each of the new business units has product portfolios based on product mix at operating facilities.
